Computer environment

Javascript

jQuery - Angular - Backbone - Meteor - Grunt - Bower

CSS3

LESS - Sass - Bootstrap - Foundation

Backend

Node - MongoDB - AWS - PHP - MySQL

Version Control

Git - GitHub - Bitbucket

Applications

Chrome DevTools - Sublime2 - Terminal - Xcode - GitHub - Photoshop

---

Advanced Capabilities

Javascript MVC/MVW

Production of single page web apps from a variety of frameworks

CSS3/JS Animation

Complex browser animation with fluid frame rates and 3D effects, with bouncy easing, across Android 2-4, iPhone, iPad, and desktop browsers.

Touch and other DOM event control

Optimized user experience between touch and mouse interfaces, for snappy, predictable, and draggable interaction.

Responsive design

Fluid CSS, Media queries, Retina vs non-retina, js window resize and orientation handlers.

Mobile debugging

Solutions for bugs, and merging APIs and behaviors between Android stock 2-4, Android Chrome, and iOs for issues concerning scroll, forms, softkeyboard, and URL bar.

Professional Development
